

FOR IMMEDIATE RELEASE AUGUST 3RD 2026

**OPEN TEE INDOOR GOLF PARTNERS WITH GERMANTOWN HIGH SCHOOL TO
SUPPORT STUDENT GOLF DEVELOPMENT**

Partnership provides approximately 20 student-athletes with a safe, climate-controlled environment to practice and develop their game

GLUCKSTADT, Miss. —August 3rd 2026 — Open Tee Indoor Golf has announced a new partnership with the Germantown High School Golf Program, providing approximately 20 student-athletes with access to advanced golf technology and a safe, comfortable environment in which to practice throughout the school golf season.

The partnership will allow Germantown golfers to train at Open Tee Indoor Golf during August, September and October 2026. With Mississippi's intense summer heat, humidity and unpredictable weather often making outdoor practice difficult, the facility gives students a reliable, climate-controlled place to continue working on their game.

With four private TrackMan iO simulator bays, Open Tee can accommodate larger school teams and organized groups. Players can rotate through the bays in smaller groups, allowing coaches to structure focused practice sessions while keeping the entire program engaged.

"We are excited to welcome the Germantown High School Golf Program to Open Tee," said Olly Thomson, Owner and PGA Professional. "With around 20 golfers in the program, the team needs a facility that can accommodate a group of that size safely and effectively. Our multiple private bays allow students to work in smaller groups, receive focused attention and continue developing their skills without being limited by the summer heat or weather."

Open Tee's TrackMan technology provides detailed ball-flight and club-performance data, video analysis and realistic virtual-course play. This allows Germantown's players and coaches to measure performance, identify areas for improvement and monitor each player's progress throughout the season.

"We are incredibly fortunate to have an opportunity like this, considering the heat regulations – and quite honestly common sense. Between the technology available, current emphasis on golf data tracking and keeping our kids safe, we will not miss one day of practice because of weather, travel distance, or course restrictions because of Olly, Jacqui, and a commitment from our administration to our sport and all sports." said Wesly Bolden (GHS Boys' Golf Coach).

Eligible Germantown High School students will also have access to a specially discounted Open Tee membership during the partnership period, allowing those who want additional practice time to continue working independently outside the team's organized sessions.

"This partnership is exactly the type of community relationship we want to build through Open Tee," added Thomson. "Our goal is to support local golfers at every stage of their development. Giving an entire school team access to high-quality technology and a dependable place to practice is an important part of that mission."

Open Tee Indoor Golf will serve as an indoor golf training and facility partner of the Germantown High School Golf Program during the partnership period.

ABOUT OPEN TEE INDOOR GOLF

Open Tee Indoor Golf is a technology-driven indoor golf facility serving Gluckstadt, Madison and the surrounding Central Mississippi community. The facility features four private TrackMan iO bays where golfers can practice, play world-renowned courses, receive instruction and analyze their performance in a comfortable, climate-controlled environment.

Open Tee offers memberships, hourly play, professional golf instruction, group events and player-development opportunities for golfers of all ages and skill levels. Members receive convenient 24/7 access, allowing them to practice and play on their own schedule.
